BIENNIAL REPORT OF THE IOWA STATE BOARD OF EDUCATION

In presenting our Eighth biennial report, the Iowa State Board of Education has little that is new to bring to your attention.

In common with boards having to do with educational affairs everywhere in America, not only those that have to do with higher institutions of learning but also those which have to do with secondary schools, we have been confronted with a problem that seems to grow more complex and difficult with each passing year. At each recurring biennium, we have thought that at the beginning of the next biennial period, the attendance at the institutions with which we have to do would have reached the peak and that it would not be necessary to ask for additional funds. But at each recurring period we have found the attendance increasing and expenditures, likewise, as a matter of course. So far as we can now see, judging the future by the past, this increase will continue. Attendance at the high schools is the best barometer, and high school attendance in the State of Iowa and elsewhere is constantly increasing. It has well-nigh trebled in the last decade.

Even so, the Board of Education, mindful of the conditions which obtain in this state and of the very natural desire on the part of the General Assembly to keep expenses down to the lowest point consistent with the right kind of service, has, practically speaking, not asked for an additional dollar at your hands. In doing this, we have ignored two very insistent needs, namely, a library building at the University and either an enlarged or a new dairy building at the Iowa State College of Agriculture and Mechanic Arts. Additional room for an ever-increasing student body at the School for the Deaf would, under ordinary circumstances, be requested, but this too we have put off to a more convenient season.

Obedient to a request from the Fortieth General Assembly, tuitions have been increased. We are rather of the opinion that we have gone as far in this as it is wise to go, but it may be that if the necessity arises, a small additional sum may be obtained from this source.

The need for better housing facilities at all the institutions is a very apparent one. The student bodies have increased far more rapidly than it was possible to build dormitories without

making requests for sums which, under existing circumstances, would be unreasonable. The Board intends to present to this General Assembly a proposition looking to an enlargement of our dormitory system without calling upon the General Assembly for any direct appropriation of money. It is an adaptation of measures taken in Wisconsin and other states having the same constitutional inhibition that we have in regard to the incurrence of indebtedness, and the plan has been reviewed and sanctioned by the Attorney General. It is not necessary to more than mention it in this connection. The plan in full will be presented to you in the form of a bill, and we trust you may see your way clear to give it your sanction. Increased dormitory facilities are imperative, and let it be said that dormitories should never be a burden upon the people. You can defend subsidizing education but you cannot defend subsidizing housing and sustenance. These should be made to pay their way. There should be at each of the institutions enough dormitory facilities to take care of all the girls in attendance, and to house at least all freshmen men; and residence therein should be compulsory, and they should all be made to pay their way and a reasonable profit besides. It is along these lines that the Board of Education is seeking to conduct the dormitories now in existence, and it will be along these lines that it will continue to operate them and any additions thereto.

We are glad to report to you that the conditions at the several institutions are exceedingly satisfactory. These institutions are serving the people at large, more generally than ever before, in fact, in a manner undreamed of a few years ago. The University is rendering a service in the way of salvaging humanity that has attracted the attention of the country and is being copied by other states, one after another. It has been well said that no greater service has ever been undertaken or more nobly advanced than this. Under the Perkins and the Haskell-Klaus Acts and through the instrumentality of the psychopathic hospital, beneficial service has been rendered to something like thirty-three thousand individuals since the enactment of these beneficent laws.

The State College of Agriculture and Mechanic Arts, through its experiment station and its extension work along the lines of agriculture, home economics and the trades, is reaching every portion of the state. Likewise the influence of the State Teachers College is being extended to practically every community in the

commonwealth. This is as it should be. The entire state should be the campus of every one of these institutions, and this last phrase is no longer a mere figure of speech, it is a fact. Through the medium of the radio, intelligence and entertainment are broadcast from each of the major institutions daily. The spirit with which the manifold activities of these institutions are carried forward could not be improved upon.

The Schools for the Blind and the Deaf are doing their work in an admirable manner, and the unfortunates entrusted to their care are being helped to the uttermost.

The Board of Education believes in the wisdom of the budget law. We have done our best to co-operate with the Director of the Budget and have sought to make his very important and difficult task as easy as possible, so far as his work relates to the interests under our charge. And we would like to say in this connection that the spirit manifested by the Director and his office could not be improved upon.

We recognize the fact that we incur some risk of running into an embarrassing situation by reason of the fact that we have decided not to ask for any additional funds during the next two years, but we feel that the period of readjustment in this state demands such an attitude on our part, and we are going to do our best to get along without any impairment of the service not only expected but demanded of the institutions entrusted to our care.

OLD CAPITOL

The Fortieth General Assembly made an appropriation of \$50,000.00, or as much thereof as might be necessary, as an emergency appropriation for the purpose of completing the fireproofing and preservation of the Old Capitol, located on the campus of the State University of Iowa, with the understanding that the work was to be done under the direction and control of the Iowa State Board of Education.

Section 3, Chapter 325, laws of the 40th General Assembly, is as follows:

"Upon the completion of said work, the said Iowa State Board of Education shall make a report to the governor of the state showing the work as completed and containing a complete itemized statement of the cost in all its details."

The fireproofing and remodeling of that building have been completed. The building, beautiful in itself, will be esteemed more and more by the friends of the State University and the people of Iowa. Many historic associations are connected with it. The architecture and construction are beautiful. The Old Capitol is a building of fascinating interest. It is in constant use.

The following report shows the expenditure of that appropriation:

Maternity and Infant Hygiene	21,213.60
Capital Expenditures	600,000.00

\$2,533,501.60

An Analysis of Past Policies of Management.

Those responsible for the appropriations for the State University have always attempted to keep expenses of all kinds at the minimum. All funds have been carefully budgeted and expenditures have been closely supervised.

During the coming biennium the State Board of Education does not intend to inaugurate new and expensive policies. However, at the present time it is forced to report frankly and specifically about the necessity of the present situation with full confidence, in view of the fact that the askings at the State University amount to an actual reduction of the burden of taxation of \$100,000.00 for the biennial period, in face of a greatly increased attendance, that there will be no hesitation in continuing the present appropriations.

Enrollment.

The enrollment this year is larger than it has ever been, and there are good reasons for expecting a substantial increase in attendance during the next biennial period. The enrollment during the academic year has more than trebled in the last decade. This is a remarkable growth. The estimate for the present year is 7,800. That is an increase of 1,000 over the attendance when the 40th General Assembly was in session.

Need of Appropriations.

The State Board of Education is not asking for more money for the State University. In fact, the requests amount to approximately \$100,000.00 less than the institution is receiving at the present time. This amount is needed in order to maintain the present efficiency. There is nothing in economic conditions to indicate any decrease in the cost of operation, labor, fuel, supplies and equipment. Then, too, competition for competent faculty members is keener than at any previous time, due very largely to educational expansion and

standards of compensation in high schools and colleges, as well as in business, industries, and the professions.

In view of the fact that the citizens of Iowa are sending more of their sons and daughters each year to the State University, it is impossible to meet these demands unless funds are available.

BRIEF ARGUMENTS IN SUPPORT OF RECOMMENDATIONS FOR APPROPRIATIONS

IOWA STATE COLLEGE OF AGRICULTURE AND MECHANIC ARTS

The askings of the Iowa State College of Agriculture and Mechanic Arts for each year of the biennium that will begin July 1, 1925, are as follows:

Administration and General Expenses.....	\$ 65,000.00	
Physical Plant Operation, Maintenance, Repairs, Replacement and Minor Improvements	500,000.00	
Library Operation	65,000.00	
		\$ 630,000.00
Collegiate Work:		
Agricultural Division	\$ 230,700.00	
Engineering Division	173,450.00	
Home Economics Division	120,850.00	
Industrial Science Division	458,250.00	
Veterinary Division	49,688.00	
Collegiate Administration	82,850.00	
		\$ 1,115,788.00
Non-Collegiate Work	\$ 75,000.00	
Vacation Courses	37,500.00	
Contingent	215,000.00	
Agricultural and Home Economics Extension	174,000.00	
Engineering Extension	32,500.00	
Agricultural Experiment Station	215,500.00	
Engineering Experiment Station	47,000.00	
Veterinary Investigations	20,000.00	
Capital Expenditures	137,500.00	
		\$ 954,000.00
		\$2,699,788.00

An Analysis of Past Policies of Management.

In previous years the discussion of items asked of the legislature has been divided into two parts. The first related to those items which are described as "absolute needs." The second related to those items which were needed but which, in the main, represented enlargements and increases that might be postponed a brief time without wrecking the work of the institution.

This year all items in the askings will be discussed in this single statement. Every item is deemed to be of the utmost importance.

It has been the policy of the Board of Education for many years to carefully budget all funds and to closely supervise all expenditures. With this business-like arrangement, already a well-established policy, it should not be difficult to adapt the financial records to the requirements of the Budget Director. The present budget, including all authorized expenditures for this, the second year of the biennium, indicates that there will be practically no unexpended funds as balances at the close of the year, with the exception of certain items that are set aside to complete work already under way or already authorized.

In other words, it appears now that there will be practically no funds at the end of this fiscal year which will be available to apply on the budget of next year.

Enrollment.

The enrollment this year will be larger, and there are good reasons for expecting a substantial increase in enrollment during the next biennium. A state institution covering the same scope as Iowa State College and located in a state not far from Iowa, where crops and prices have been good, this year has shown an increase of new students amounting to about seventy-five (75) per cent. There are many hundreds of young men and women who wish to attend Iowa State College and whose families also desire them to attend, but who are not in the college now because of lack of money. As soon as financial relief is in sight, many of those young people will report for enrollment.

Increasing Demands.

Demands upon the budget are increasing by reason of increasing demands to lengthen the list of subjects in the curriculum. Only a few years ago there was no demand for, and it was not necessary to give, much instruction in plant diseases. But in the period of a few years numerous devastating plant diseases have appeared in this state, and a large staff of teachers is kept busy on this group of subjects. Other similar changes and enlargements of demand upon the institution might be cited. Just now pressure is being brought to bear upon this and other institutions of higher learning to provide more and better instruction in citizenship. The State Bar Association has passed resolutions asking for this enlargement in the curriculum.

At the present time there is an increasing demand for college instruction in marketing, co-operation, and farm finances. The advantage of instruction in commerce for persons going into business long has been recognized. Instruction in farm business has a similar advantage for farmers, many of whom conduct operations on a capital as large as some banks and larger than the capital of many commercial or manufacturing establishments. Farmers are insisting that their sons shall be given instruction in economics as applied to agriculture and in commercial methods in so far as these are of importance to practical farmers. The President of the United States, in a recent address, called attention to the fact that the farmer is not only a producer but a merchant as well, and that quantity production may actually harm the farmer unless he also can have scientific marketing. The President said, "I feel that too little thought has been given to this most important phase of agriculture. I want to see courses in co-operative marketing and farm economics alongside of soil chemistry and animal husbandry. The agricultural problem of today is not on the side of production, but on the side of distribution. I want to see a good farmer on a good farm raise a good crop and secure a good price."

At Iowa State College a good beginning has been made in giving instruction in agricultural economics, but it must be admitted that this instruction is far from sufficient to meet the present needs of the state. These needs cannot be met without an increase of support.

In the same address, President Coolidge called upon land grant institutions throughout the country to be concerned in contributing in every possible way to making a better rural civilization. He said, "Your efforts comprehend all the problems of better farming methods, of larger and cheaper production, of conserving all resources of the soil, of more efficient marketing, of better homes, better rural schools, better places of religious worship, and more intimate and helpful neighborly kindness among the people of the open country."

In this connection, attention cannot be too often called to the fact that cities have been, and always will be, made up largely of people from rural districts; and that, in the end, the character of cities and the ideals of their people are largely determined by the character and ideals of the people of less than one generation before who were living in the country. Therefore, agricultural education and home economics education are of vital importance.

1. Administration and General Expenses (For each year of the biennium) \$65,000.00

This item includes the salaries of the executive officers, secretaries, clerks and stenographers, and printing.

2. Physical Plant Operation, Maintenance, Repairs, Replacements and Minor Improvements (For each year of the biennium) \$500,000.00

The item of \$500,000.00 each year of the biennium for physical plant operation, maintenance, repairs and replacements covers the cost of heating, lighting, sewers, sewage disposal, water supply, janitor service, care of grounds, etc. The cost of coal is by far the largest of these items. This asking represents merely a continuation of present costs and does not represent any increase further than is absolutely necessary because of the increase of the plant.

3. Library Operation (For each year of the biennium) \$65,000.00

The item of \$65,000.00 per annum for Library Operation includes the purchase of necessary books, the binding of books, and the salaries of officers and assistants. With the new library completed following a period of the utmost economy in the purchase of books, the item now asked seems moderate and represents far less than could be used to advantage. The opportunity to secure scientific works of great value will not be as good next year as it is this year. Each year it becomes increasingly difficult to secure volumes which are now out of print but which are vital to any institution conducting investigations in the field of science.

4. Collegiate Work (For each year of the biennium) \$1,115,788.00

The item of \$1,115,788.00 annually for collegiate work includes a considerable part of the cost of maintenance of the plant for collegiate work which is the largest activity of the institution. The chief item is for salaries of teachers, the labor of many of whom continues through all four quarters of the year. Last year the corresponding item supported the work of approximately five thousand students.

This money, if granted, will be disbursed somewhat as follows:

Purpose.	Amount Annually
Agricultural Division	\$230,700.00
Engineering Division	173,450.00
Home Economics Division	120,850.00
Industrial Science Division	458,250.00
Veterinary Division	49,688.00
Collegiate Administration	82,850.00

\$1,115,788.00

5. *Non-Collegiate Work (For each year of the biennium).....\$75,000.00*

The item requested for this is \$75,000.00 annually. These courses are of very great value to a worthy group of young people who, for one reason or another, cannot take regular collegiate courses.

6. *Vacation Courses (For each year of the biennium).....\$37,500.00*

For the support of vacation courses the askings include an item of \$37,500.00 annually. This is to continue work which has been conducted in the past, including a growing summer session and short courses. Numerous short courses attended by thousands of people are now provided for different times of the year, mostly in the vacations but also overlapping the regular college term.

7. *Contingent (For each year of the biennium).....\$215,000.00*

The item of \$215,000.00 for each year of the biennium under the title "Contingent" is set aside under this separate heading as was done in a preliminary arrangement of items as made in the office of the Budget Director. This item has been made by reducing other items in the list below what it was estimated would be needed in each case. Fluctuation, which cannot be foreseen now, will occur during the next two years. There will be extra demand for one kind of expenditure because of some emergency and there should be opportunity to reduce the expenditure in some other line where the need is less urgent. If the conditions continue normal, then the contingent fund will be distributed back to the several items from which it has been taken. If some abnormal or emergency condition arises, as seems to be the case every biennium, then there will be opportunity to care for it in the best way possible within the limitation of the total funds available. It is desired to make very plain the fact that this contingent item is urgently needed. Even under normal conditions, it may be, and probably will be, more urgently needed in connection with some unfortunate condition.

8. *Agricultural and Home Economics Extension (For each year of the biennium).....\$174,000.00*

The asking of \$174,000.00 annually for Agricultural and Home Economics Extension is \$17,500.00 less than the amount followed by the Fortieth General Assembly for this work. Extension service has been developed for the benefit of the many people who cannot go to the college but who want certain advantages of the college to be brought to them. Through the Extension Service, great benefits

are given to the taxpayers throughout the state, and at minimum cost.

Agricultural and Home Economics Extension for which an appropriation of \$190,000.00 each year of the biennium has been provided, represents one of the most profitable lines of work of the college. This extension service carries out to the farmers of the state the results of the experiments, demonstrations, and tests which are of the highest value. Objection has been raised to this appropriation on the ground that the work costs too much. The actual cost of this extension work as administered through Iowa State College amounts to less than one penny per week for the average farmer of Iowa. On the other hand the returns are large, as is being testified constantly by many farmers throughout the state.

An item of \$1,500.00 a year for Apiary Inspection was provided several years ago for the purpose of getting rid of diseased colonies of bees. The item is so small that it is impossible to keep up with the spread of disease, but the best work that can be done is being rendered by the Agricultural and Home Economics Extension Service with this limited support. Bee culture is supposed by many persons to be of importance only because of the honey produced, but the real value of bee culture comes in the fertilization of plants as effected by the bees busily searching for nectar. Without this fertilization plant production would shrink enormously.

9. *Engineering Extension (For each year of the biennium).....\$32,500.00*

The Engineering Extension Service, which has been receiving \$35,000.00 each year of the biennium, brings the service of the college to large numbers of persons residing chiefly in the cities and small towns and interested particularly in trades and industries. The work for such persons is comparable with agricultural extension for farmers. This appropriation supports special short courses for metermen, canners, dyers and cleaners, painters and telephone operators, bakers, and other groups of workers who are engaged in important and constructive occupations. Three times the amount asked could be used to advantage and would bring profitable returns to the state. The statement is based upon the applications from citizens of Iowa for assistance through the Engineering Extension Service which cannot be rendered because of lack of funds.

10. *Agricultural Experiment Station (For each year of the biennium).....\$215,500.00*

It is not believed that any argument is needed in support of ap-

proprations for research through the Agricultural Experiment Station. Research is fundamental to all technical instruction and such instruction to be vital and timely and constructively helpful, must be in contact with effective research at all times. New problems are constantly arising. This fact is due to increasing population, "the constant subduing of Nature," the approaching exhaustion of natural resources, and the frequent appearance of a new insect or a fresh disease which, without its natural enemies to hold it in check, proceeds to work devastation without restraint.

It is a modest claim to say that research work performed in this institution and in similar institutions in other states, the benefits of which are not limited by state lines, is worth to Iowa much more than fifty millions of dollars a year. In other words, if this state were deprived of the benefits of such research work as is conducted in this college, the people of the state would suffer losses exceeding fifty millions of dollars a year. The very moderate expenditures of state money for research are comparable with payments on insurance policies.

The most important question before the people today is the one regarding the marketing of farm produce. While for many years considerable emphasis has been placed on the question of production, insufficient information has been given the farmers about marketing. Because of the rapid decline in the price of most agricultural products during the last few years, farmers are intensely interested in learning how to dispose of their crops to the greatest advantage. This is a large question and it must be given careful thought and study.

11. Engineering Experiment Station (For each year of the biennium)\$47,000.00

The Engineering Experiment Station is investigating problems of great concern to the industrial interests of the state.

12. Veterinary Investigations (For each year of the biennium) \$20,000.00

New animal diseases are constantly appearing. These can, and sometimes do, quickly cause enormous losses.

13. Capital Expenditures (For each year of the biennium).....\$137,500.00

The asking of \$137,500.00 for each year of the biennium for Capital Expenditures is vitally necessary. It will be used for additional construction, equipment and extension of the heating, water and sewerage systems.

It has been customary to make an appropriation for use annually in the construction of small buildings, additions to buildings, re-

modeling of buildings, and providing certain equipment. For this purpose \$50,000.00 a year, or \$100,000.00 for the biennium, was appropriated two years ago. This fund is used to great advantage. The exact needs cannot be seen two years in advance, but it is known they will come with the growth of the institution and the changing demands upon it and with the changing relative enrollment in different lines of work. From this fund, small buildings are erected for educational and research purposes and old buildings are improved and put into suitable condition for use.

An item for equipment of buildings and departments—\$45,000.00 a year, or \$90,000.00 for the biennium—was appropriated two years ago and unfortunately does not represent the most important needs along this line. The Chemistry Building, erected about ten years ago, still has some laboratories equipped with loose planks laid on frame horses, and glassware for individual students is still kept in little boxes like soap boxes. It would have been an economy to equip this building at once. Because of lack of funds, the work has proceeded slowly, and at present rate this installation of necessary equipment will need to continue a few more years. This item provides, also, for necessary equipment of new buildings.

For extension of the heating, water, and sewerage systems an item of \$85,000.00 for the biennium, or \$42,500.00 each year, is very important. It is needed to continue improvements that have been carried on during the present biennium with an equal fund. Much of the water system on the campus was installed from thirty to fifty years ago. Pipes are now far too small for ordinary use, some of them are rusted so as to be almost worthless, and they are totally inadequate to carry water for fire fighting purposes. The sewage disposal plant has been outgrown with the result that raw sewage must at times be allowed to flow directly into the stream. The heating plant is in need of certain mechanical equipment to increase its capacity.

The Board of Education has not renewed the request for an appropriation for Buildings and Land (\$250,000.00 a year) such as has been appropriated for use annually since July 1, 1921.

And, of course, there is no item asked this year to correspond with the appropriation of two years ago to rebuild the Armory which had been destroyed by fire. It is intended to use such part of the Contingent Fund of \$215,000.00 as is not needed for maintenance and other purposes as a building fund. Such portion of this Contingent Fund as is available for new buildings will be

called for from many directions. The Board of Education will have to decide which of the demands is the greatest. Some of these are:

A Laboratory Building for the Department of Farm Crops and Soils.

This department is seriously handicapped for want of space.

A Foundry.

The foundry is used to capacity. For several years it has been inadequate. It is not provided with dressing room or toilet, and it is grossly deficient for the educational work conducted there.

A Dairy Building.

This is considered the most important need for a large building. The dairy industry brings into the state annually about \$150,000,000.00. The industry is complex. Instruction needs to be given in handling market milk, butter making, cheese making, condensing milk, drying milk, testing dairy products, chemical and bacterial actions, and cold storage; and there are other less important subdivisions. The present dairy building was erected in 1905 when the enrollment in this college was about one-third what it is now. The building is so small that no effort is being made to give instruction in more than half of the topics that should be included. This means a loss to the State of Iowa. Such instruction and research in dairying as would be provided by a suitable building would result in an increase in dairy income for this state which would equal many times the total cost of a new building.

Certain Buildings on Experimental Farms are Vitrally Needed.

The college has experimental farms with no more building equipment than would be required by an average farmer. This has to suffice for experiments which should have abundant building space. For example, on the Agronomy Farm different kinds of seed are planted on plots a small fraction of an acre in size. There are scores of these plots and the production of each must be kept apart from all others and threshed separately. There are special operations in sorting, drying, weighing and analyzing. All this requires building space. Furthermore, the farm is visited each year by thousands of Iowa farmers. There should be suitable shelter for them to gather and hear about the experiments and see exhibits, especially photographs of crops under conditions earlier in the season for comparison with what the farmers may see in the fields at the time of their visit. And on the Veterinary Research farm there should be some special buildings where animals having

disease may be isolated and studied, and very carefully isolated buildings where contagious diseases may be investigated without danger to surrounding farms and stock. There is no intention of bringing any contagious disease on to the farm from out of the state. If such a disease has to be investigated it would be better to go out of the state. But when a new contagious disease appears in this state, as it sometimes does, and when farmers are sending to this college for information and coming in person to ask for it, then it is time to conduct investigations on the college property, and suitable provisions should be made for such work. The Horticultural Experimental Farm and the Animal Husbandry Experimental Farm are equally in need of buildings. With the exception of a few small sheds that it was necessary to erect, they have now only the old farm buildings that were in use before the college acquired the property.

Other important buildings include a plant industry building, enlargements of gymnasium space for women and men, an addition to the Agricultural Engineering Building, and still other structures.

One of the very important building needs is dormitory accommodations for freshman men students. These young men are now compelled to shift for themselves. They are not as successful in finding homelike places in rooming houses as were the students of several years ago. Dormitories are needed to set better standards of living, to help control prices and to reduce crowding. These buildings should be conducted on a self supporting basis. There are now many examples in other states to prove that this can be done.

In the consideration of appropriations for Iowa State College it is interesting to note that this college, which is founded upon a federal law duly accepted by the State Legislature, has received in appropriations and allotments of funds from the federal government altogether a sum practically equal to the total cost of all buildings on the college grounds. This indicates assistance in a large way from the federal government. Such assistance is given for the purpose of promoting the types of education conducted here and the interests of the increasing numbers of students who seek these kinds of education.

BRIEF ARGUMENTS IN SUPPORT OF RECOMMENDATIONS
FOR APPROPRIATIONS

IOWA STATE TEACHERS COLLEGE

The askings of the Iowa State Teachers College for each year of the Biennium that will begin July 1, 1925, are as follows:

Administration Department and General Expenses.....	\$ 55,500.00
Physical Plant Operation and Maintenance.....	90,500.00
Educational Purposes	413,000.00
Hospital	8,250.00
Contingent	70,274.00
Extension Summer Schools	35,000.00

Total Support for each of the biennial period that will begin July 1, 1925.....	\$672,524.00
Extension	49,750.00
Capital Expenditures	10,000.00

Total askings for each year of the biennium.....\$732,274.00

The request for an annual appropriation of \$413,000.00 for each year of the biennium is based on the following:

An Analysis of Past Policies of Management.

Those in charge of the financial management of the State Teachers College at Cedar Falls have always shown a disposition to reduce to the minimum the expense on all kinds of overhead, even if a larger expenditure could have produced a more satisfactory record than the present system can advertise as existing. The theory of administration that has been adopted as a wise public policy consists of putting the money received from the State into actual returns shown by students educated and trained for the serv-

ice of the public schools of the State, rather than into brilliant efforts at administration that make a notable showing for organization, expansion and display. It has been recognized that in managing an educational institution the policy should be to have no more administrative officers than are absolutely necessary; to maintain the smallest clerical force consistent with the amount of tasks imposed; and to accept few, if any, enterprises that require promotion, propaganda and development. The most careful investigation of the costs and undertakings of the Iowa State Teachers College for the last quarter of a century will prove that those responsible for the management of affairs have never amplified the actual needs by asking for unexpected appropriations or by making estimates that anticipation did not justify or that final results did not exhibit as essential and reasonable. This discussion of past history is appropriate in this introduction, as the same policy is to be adhered to by this institution in requesting appropriations for future support and in expending such funds after they have been granted. With this understanding, we submit the following brief arguments, using the several classified titles that have been adopted for the making of this report.

1. Administration Department and General Expenses (For each year of the biennium)\$55,000.00

This item includes the salaries of the executive offices of the president, deans, secretaries, clerks and stenographers for each year. No estimate for increases of those salaries, or for enlargement of subsidiary expenses such as are sure to obtain in a growing institution is included.

2. Physical Plant Operation and Maintenance (For each year of the biennium)\$90,500.00

This appropriation will cover the salaries of the superintendent and his employees, such as engineers, electricians, firemen, yard men, watchman, steam fitters, plumbers, storekeepers, janitors and laborers. The number of those so employed is not given here, the decision being made on the present force of employees, and on the basis of wages similar to those now paid. All these wages are at a minimum rate. No increase is allowed for supplies or for operation or workmen. The ordinary repairs are estimated at the same as present cost, although there will be more buildings to maintain and more service of emergent kinds that could easily come up for adjudication and consideration. Repairs and maintenance are not a constant quantity from year to year but it is believed that, should

this appropriation be granted, a reasonable standard of efficiency could be obtained by economic prudence and fair judgment.

3. Educational Purposes (For each year of the biennium).....\$413,000.00

Additional expense for Faculty of Instruction that must be obtained from other sources if the present staff and moderate salaries are continued, \$37,000.00. This deficit in the appropriation requested must be obtained from the income received from the student fees during the four terms of the year. It must be recognized that this total includes the Summer Term salaries that cost, in 1924, \$113,000.00. The total amount needed, estimated from the last twelve months' experience, is \$450,000.00.

4. Hospital (For each year of the biennium).....\$8,250.00

The expense of maintaining the hospital service during the school year is very difficult to estimate, as circumstances alter conditions and requirements. It has been found that the appropriation requested, together with fees received from patients and other sources that can be used for emergencies, is sufficient to protect the service and give the relief that a large student body expects. This appropriation does not consider any possible emergency or any enlargement of undertakings.

5. Contingent (For each year of the biennium).....\$70,274.00

The request includes Library supplies, purchases and salaries of librarians and assistants, \$36,000.00; fuel for one year of twelve months, \$45,000.00; and department expenses in the line of equipment and special expenditures for one year contributory to instruction, \$18,000.00.

If this appropriation is granted, it remains yet for an amount of \$28,726.00 to be obtained from the income of tuition, dormitory rents and other sources such as are incidental to the services.

6. Extension Summer Schools (For each year of the biennium).....\$35,000.00

This appropriation is a repetition of the amount granted by the 40th General Assembly. It does not anticipate any expansion of the work. The extension summer schools are located in selected centers away from Cedar Falls. Such institutions are necessary because it is not possible to house and teach at the Iowa State Teachers College during the summer term the entire number of students that have been enrolled in past years when the extension summer schools have been maintained. No work that the College has undertaken has been done at so little expense per capita. This

is due to the season of the year and to many other contributing and well known causes, such as expense of travel and entertainment.

7. Extension (For each year of the biennium).....\$49,750.00

This appropriation is a repetition of the amount that has been expended during each year of the present biennial period. There will be no expansion of the work of extending assistance to the teachers in service—work that is recognized as being of the greatest benefit for the education and training of teachers of the elementary pupils of the public schools. It is a fact that cannot be disproved or gainsaid that the time when such instruction will become unnecessary is too far away in the progress of civilization to be worthy of present day consideration. More, rather than less, should be expended to help certain groups of teachers to secure a more effective education and a more qualified judgment on school management and methods. No agency has yet been discovered or invented that is superior to such extension service as the Iowa State Teachers College has maintained at a most moderate cost.

8. Capital Expenditures (For each year of the biennium).....\$10,000.00

This anticipated expenditure has to do with provisions coming from the maintenance of the heating plant such as new boilers, etc., that regularly must be accepted. The expenditures of the past four years show that this a very reasonable estimate of this kind of expense. Until the State provides the money for the building of a new and modern heating plant at Cedar Falls, this estimate must be a permanent appropriation. This proposition is made because it is inferred that the State prefers just now to postpone the time when this permanent improvement can be undertaken. This situation is the only unsatisfactory condition that now exists at the Teachers College. It is hoped that it may be permanently remedied in the near future and that the expansion of the buildings may be otherwise provided for in the policy of the State.

**BRIEF ARGUMENTS IN SUPPORT OF RECOMMENDATIONS
FOR APPROPRIATIONS**

IOWA SCHOOL FOR THE BLIND

The askings of the Iowa School for the Blind for each year of the biennium that will begin July 1, 1925, are as follows:

Support	\$76,000.00
Repair and Contingent	7,000.00
Oculist Fund	100.00
Specials:	
Piano and Furniture	2,000.00

Improvements	2,500.00
Equipment	2,500.00
Total	\$90,100.00

1. Support (For each year of the biennium).....\$76,000.00

The askings for each year have been decreased by \$4,000.00. Since there is a comfortable balance, it might seem that the askings could have been reduced still further; but, for the following reasons, it has not been deemed wise to do so:

First, the attendance at the School for the Blind is the largest it has been for several years. No one can tell whether or not this increase will continue in the future, but it is more likely to increase than to decrease, since the adult blind are constantly asking to share the benefits of the school. Iowa makes no provision for the adult blind, in the matter of education; and, therefore, it has been the policy of the present administration to admit as many as could be provided for without detracting too much from the opportunities of those within the legal age.

Second, there are needs that should be provided for within the next two years. These are not the accustomed needs. Only two will be mentioned as illustrations—an electric elevator and additional teachers. Ours is a four-story building. Many of the teachers find so much stair climbing very tiresome; and some of the students, on account of ill health, find it hard. Some have been obliged to use the freight elevator because of the inability to climb so many stairs. Additional teachers will be needed if sight conservation work is to be carried on in a systematic way, as it should be with certain pupils who see fairly well but who do not see well enough to attend the school for the seeing. Were clear type books paralleling those in Braille and Point available for use, systematic sight conservation would be possible without increasing the teaching force; but such books are nowhere to be found. Therefore, divisions of pupils in separate classes is the only solution, and this means increased teaching force.

2. Contingent and Repair (For each year of the biennium).....\$7,000.00

The askings for this fund show an increase. This is due to the fact that it is reasonable to suppose that new coal bunkers will be needed within the next biennial period. Those now used are in need of much repair. The walls have been braced and have been tied together in a number of places by connecting rods. How long they will stand the strain of the coal pressure is a question, and it has been thought wise to be on the safe side. The walls are of

soft brick and, like many other soft brick walls, are disintegrating. An increase will be needed if this repair work is to be done and in the next two years.

3. Other Funds.

It is estimated that about the same demands will be made upon these funds as in the past. The demands upon the equipment fund will be rather heavy because of the purchase of Braille books. Six years ago a gradual introduction of the Braille was made, and in consequence of the change then made the first seven grades are using Braille instead of New York Point. Next year another grade will be added, and so on until every grade of the school will be using Braille instead of New York Point. Point books of any kind are expensive, a set of books in geography alone costing \$34.50. If this be multiplied by ten, about the average number demanded, the amount necessary for the geographies alone will amount to \$345 a year. Other books are equally expensive. The need is increasing rather than decreasing. However, it will be noted that the askings for each year are less by \$4,500.00 than during the present biennial period.

BRIEF ARGUMENTS IN SUPPORT OF RECOMMENDATIONS FOR APPROPRIATIONS

IOWA SCHOOL FOR THE DEAF

The askings of the Iowa School for the Deaf for each year of the biennium that will begin July 1, 1925, are, as follows:

Support	\$195,000.00
Scholarships	500.00
Specials:	
Repair and Contingent	15,000.00
Library and Bookbinding	1,000.00
Equipment	12,500.00

Total

The equipment fund will be expended about as follows:

Purpose.	Amount Biennial Period.
a. Water softener	\$3,500.00
b. Linotype	4,000.00
c. Farm and Barns	2,500.00
d. Classroom	3,000.00
e. Industrial	2,500.00
f. Lighting grounds	5,000.00
g. Gymnasium	1,000.00
h. Engine room	2,500.00
i. Garden and grounds	1,000.00

Total for Biennial Period that will begin
July 1, 1925

\$25,000.00

For the last five years, the Iowa School for the Deaf has had a steady, permanent growth of from 20 to 25 pupils annually; and the indications are that a similar growth may be expected during the next biennium. This growth is shown in the following tabulated statement:

	September	January	Entire Year
1918-1919	148	168	182
1919-1920	172	193	190
1920-1921	169	188	208
1921-1922	190	208	231
1922-1923	216	238	252
1923-1924	235	276	292
1924-1925	275	300 (Estimated)	320 (Estimated)

There are 40 or 50 more children whose applications are on file for admission. From 20 to 25 of these are little ones from 5 to 8 years of age.

For the biennium, we estimate an enrollment of 320 pupils, and ask an annual appropriation of \$196,500.00 a year for **Support**, as follows:

General (annually)	
a. Support Fund, \$16,000 per month or 320 pupils at \$615.00 per capita	\$195,000.00
b. Library and Bookbinding (annually)	1,000.00
c. Scholarships (Gallaudet College) (annually)	500.00

Total (annual) Support

1. Support (For each year of the biennium) **\$195,000.00**

The annual cost for support and education of a deaf child in this school is approximately \$615.00. This includes general instruction; industrial instruction, housing of pupils, teachers and employees; teachers' salaries, and wages of all employees; also food and household provisions for approximately 400 persons.

In 10 similar schools in the east and middle west, the per capita cost of maintenance and instruction for the year 1923-1924 was as follows:

Illinois	\$640.00
New York (Fanwood)	750.00
North Dakota	750.00
New Jersey	700.00
Minnesota	500.00
Philadelphia	526.00
Missouri	580.00
South Dakota	750.00
New York (Lexington Avenue)	530.00
Rhode Island	550.00

This list shows an average of about \$625.00. The per capita of the Iowa School for the same period was \$556.00. During the last biennium there has been, in all the schools, a considerable increase for support and education, which shows no immediate signs of les-

sening. The 45 additional little ones in Primary Hall, and the maintenance of that branch of the school as a separate unit, have added to the general maintenance cost; but the results justify the expenditure.

2. Scholarships (For each year of the biennium) **\$500.00**

This is to help worthy young men and women, graduates of our school, to pursue a higher course of instruction at Gallaudet College, Washington, D. C. It was also formerly a permanent appropriation. At present we are assisting three students. The School has five students in the College this year. This appropriation should also be continued.

3. Repairs and Contingent (For each year of the biennium) **\$15,000.00**

Twenty buildings, large and small, constitute the plant—six of brick construction, six fairly large buildings of wood construction, and eight smaller wooden buildings. Some of these are old and require constant repair. \$15,000.00 annually is required to meet this demand if the buildings are to be kept in good repair and in fit condition for housing the children, the employees and the animals.

4. Library and Bookbinding (For each year of the biennium) **\$1,000.00**

This item heretofore was a permanent annual appropriation for library books and repairs to old books. This is a very necessary part of our work and the appropriation should be continued. Reading constitutes one of the most important phases of the instruction of the deaf, and the constant wear and tear requires a new supply frequently.

5. Equipment (For each year of the biennium) **\$12,500.00**

This item includes the necessary wear and tear upon the equipment of the property and the additional permanent improvements which are constantly required to keep a plant of this character properly supplied with the necessary machinery and apparatus for smooth and economical operation. This item constitutes expenditures, as follows:

Equipment:	
Classroom	\$3,000.00
Water softener	3,500.00
Linotype	4,000.00
Farm	2,500.00
Industrial	2,500.00
Lighting Grounds	5,000.00
Gymnasium	1,000.00
Engine room and laundry	2,500.00
Grounds and garden	1,000.00
	\$25,000.00

Recapitulation:

General (annually)	\$196,500.00
Repairs and Contingent (annually)	15,000.00
Total—General (annually)	\$211,500.00
Total—General (biennium)	423,000.00
Special:	
Equipment (biennium)	25,000.00
Total Appropriations for Biennium	\$448,000.00

SUPPLEMENT

The following is the recommendation of the Superintendent:

In addition to the above, in order that accommodations may be made for the normal increase during the next two years, I respectfully recommend that another wing, similar to the one built two years ago, be added to Primary Hall, to house from 30 to 40 more young children. The wing should include the necessary living rooms for from 10 to 15 teachers, officers and servants who work in that building. At present 10 persons working in Primary Hall are compelled to live in the main building, thus adding greatly to the congestion in that building and occupying much needed space in the main building, which could otherwise be used to house pupils. This space was originally intended for that purpose. The question of available space to accommodate the normal increase is an important one at this time, as this year our housing capacity will be taxed to the utmost. At least \$50,000.00 will be required to add such a wing to Primary Hall. As an alternative, it may be necessary to require 10 or 12 teachers and officers to live in Council Bluffs with the necessary money allowance for living out. This would add about \$5,000.00 annually to the support budget.

REPORT OF IOWA STATE BOARD OF EDUCATION

¹Annual Appropriations. These appropriations will expire on June 30, 1925. They were repealed by the Extra Session of the 40th General Assembly.

²Annually for Each Year of the Biennium. These appropriations, which were granted by the 40th General Assembly for the biennium that began July 1, 1923, will expire on June 30, 1925.

³Total. This total is the sum of the appropriations which were made by the 36th General Assembly and the 40th General Assembly, respectively. Add the "Annals" and the appropriation marked "Annually for each year of the biennium."

⁴Legislative Askings. The report shows that, with the exception of the item, entitled, "Soldier Tuition," the requests for Support, Maintenance and Other Purposes for the State University are the same as the State Appropriations for the year 1924-1925.

⁵Child Welfare. The 37th General Assembly made an annual appropriation of \$25,000 for the maintenance of the station. This appropriation was repealed by the Extra Session of the 40th General Assembly and, therefore, it will expire on June 30, 1925.

⁶Maternity and Infant Hygiene. The 40th General Assembly made an annual appropriation of \$21,713.00 for the maintenance of the station. This appropriation was repealed by the Extra Session of the 40th General Assembly and, therefore, it will expire on June 30, 1925.

⁷Special Appropriations. The appropriations marked "Specials" are granted for certain definite and specific purposes, temporary in character, and are for the biennium only. Twice the amount of each "Special" shown in this exhibit was provided by the 40th General Assembly for the biennium that began July 1, 1923, and ends June 30, 1925. This report, therefore, shows one-half of such biennial appropriations.

⁸Special Requests. The Iowa State Board of Education will ask the 41st General Assembly for twice the amount of each "Special" shown in this column. As a rule, one-half of each "Special" is made available for each year of the biennium.

I hereby certify that above report is accurate and correct to the best of my knowledge and belief.

C. S. CORY, Registrar.

July 26, 1924.

*The decrease from the previous year was produced by a smaller enrollment in Extension Summer Schools due to delay in appropriations which prevented early organization.
**This decrease from the previous year was due, not only to the reason set forth in the note above, but also to the fact that fewer credit classes were organized since the budget did not provide enough money to meet the demands.

CAUSE OF BLINDNESS

Regarding the causes of blindness, I am in doubt as to whether the statute requiring a report of this character contemplates the original cause of blindness or the immediate cause. I have concluded to make the report on the original cause so far as that can be determined.

It is as follows: (I shall make report for the entire list of students enrolled during the biennium.)

1922-1923

Leukoma cornea	12	Corneal nebulae	1
Aphakia	3	Congenital cataracts	8
Secondary glaucoma	7	Secondary cataracts	2
Congenital glaucoma	2	Highgrade myopia	3
Interstitial keratitis	7	Highgrade hyperopia	4
Cecatricial keratitis	1	Trachoma	3
Optic atrophy	15	Phthisis bulbi	21
Buphthalmus	3	Choroiditis	2
Chorioretinitis	6	Leukoma adherens	2
Congenital coloboma	2	Sympathetic ophthalmia	5
Uveitis	2	Hydrophthalmus	1
Microphthalmus	1		

Of the above, the blindness of 18 was caused by gonorrheal infections at birth; 10 by syphilitic infections at birth; 7 by injury,

1923-1924

Ophthalmia Neonatorum (origin gonorrheal)	21
Syphilis	12

STUDIES PURSUED

In many respects the School for the Blind follows the same line of studies as the schools for the sighted. We have not only the usual eight grades admitting to high school standing, but the high school as well, and any boy or girl graduating from the academic department of the College for the Blind is prepared to enter the State University or any of the colleges of Iowa. The course of study is practically the same as that of the schools for the sighted. Mathematics, English, History, Spelling, Writing, Geography, Science and Latin are all included in the course of study.

However, there are some important differences. In the Iowa School for the Blind each pupil, unless excused by the nurse or the School physician, is required to take physical training work and for this purpose an hour a day is given to gymnastics. I believe that this work has been of great value to the pupils at the Iowa College for the Blind, not only from the standpoint of health but also from the standpoint of muscular movement. A great many blind children are naturally timid, others are inclined to inactivity because of blindness; and the training that they get in the gymnasium has been of incalculable benefit to them in overcoming either timidity or inactivity.

Every pupil is required to take some industrial work, unless there are other handicaps than blindness. This requirement is based upon two conclusions: First, we believe that such industrial work has an educational value outside of its vocational value; second, we believe that every pupil should be trained in the means of self-support. It is perhaps true that all of our pupils will not enter the vocations which the College for the Blind prepares them for. Some of them will, as experience has shown; and all of them should go from the school prepared for some useful occupation along the lines of our instruction, useful at least until some more inviting opportunity presents itself, as also experience has shown. To this end we offer a course in basket making, rug and carpet weaving, chair caning, broom making, hammock tying, piano tuning and dictaphone operating. We have done some work in the field of floriculture since the greenhouse has been built. However, as yet, the work has not been systematized and I cannot make an intelligent report along this line. We are hoping in the near future to make an intelligent and valuable use of the greenhouse for educational purposes. I am of the opinion that many of our totally blind boys and girls may come into a fine appreciation of flowers through the sense of smell. And then, there are others who have some sight who may be able to reap some practical rewards as a result of the study of floriculture.

In this connection I may say that we have had under consideration the establishment of a model store for the blind, where our boys and girls may be taught correct business methods, as well as some of the

fundamental principles of salesmanship. Too often it is taken for granted that a blind boy or girl is limited to the simple occupations that require training in touch only, while experience has shown that blind men and women have become successful in business. It is not a question of blindness; it is a question of the boy and girl, a question of their natural tendencies, a question of their individual capacities. There have been five reunions held at Vinton since I have had charge of the work at the College for the Blind. To these reunions have come blind men and women, most of them graduates of the College, from all parts of the State, as well as from other states. The most of them would be called successful. There have come successful business men, successful lawyers, successful osteopaths and chiropractors, successful teachers, successful preachers, successful industrial workers, successful musicians, successful homemakers. The point is, that we cannot, nor do we want to, educate the child contrary to his natural tendencies, provided those tendencies be wholesome and serviceable; but, on the contrary, we must endeavor to draw out the best that is in him, until every static force for good becomes dynamic. There are perhaps many, many lines along which blindness is not insuperable and I feel that our work should have a very broad educational basis.

I have referred to important differences when the Iowa College for the Blind is compared to the schools for the sighted. This is nowhere better illustrated than in the department of music. In this department the work has a two-fold purpose: First, to train the child in a proper interpretation and appreciation of music; second, to test the pupils with reference to a musical career. Some work is required of all, and all musical studies are within the election of all, unless, in the judgment of the teachers, it would be a waste of time to continue the study of music. In the pursuance of these purposes we are conscious of the fact that mistakes have been made; but, on the whole, it has had beneficial results. It has led to the discovery of one or two students who may be highly successful in the field of music. We are offering, under the guidance of competent teachers, instruction in voice, violin, piano and organ, cornet and orchestra. Every student is required to take some voice work; all are encouraged to test themselves in other lines. A year or so ago we organized among the small boys a "kinder band." It was a mere experiment in the effort to teach rhythm and tone and time. It was an experiment that succeeded beyond my expectations and the work has been extended to include the small girls. The original band consisted of eight primary boys. Three of them played the mouth organ; two the bones; one the snare drum; one the triangle; and one the cornetina. After eight weeks' practice these boys, under the leadership of Mr. Charles Olson, teacher in the tuning department, played at Chapel, much to the delight of all present. During the past year other instruments have been added. In this connection permit me to say, that blindness is no asset in the field of music. It is commonly supposed that the blind are more musical than the sighted. I do not believe that this is true. If the blind achieve greater results it is because of closer and more persistent application as well as superior instruction on the part of teachers. However, music is a wonderful asset to the blind and should be encouraged.

TRADES TAUGHT

This part of the report has probably been made with sufficient fullness under the topic "Studies Pursued," but it may not be out of place to restate them for the sake of clearness. We have been teaching the following trades:

Broom-making, chair-caning, pattern weaving, rug and carpet weaving, basket-making, hammock tying. Besides these, perhaps not to be considered as trades, but preparation for future occupation, there are typewriting and dictaphone operation together with music. When

dictaphone operation and typewriting are mentioned it is at once concluded by many people that they are useless as occupations for the blind; but it must not be forgotten that there are a great many boys and girls who have sight enough to enable them to correct their own work. Besides they are not wholly impracticable for pupils who are totally blind. Experience has demonstrated that the totally blind may make successful typists and dictaphone operators. In the teaching of these occupations we have not lost sight of the great educational value of hand-training through such occupations. I refer to this fact because frequently when parents bring pupils to us these trades and occupations seem foreign to their own plans for their children. However we believe that they give important means of education in the broad sense of the term.

The above tables give a fair representation of the work done in the Industrial Department. The table is based upon selling price or marked price. In connection with the above tables it should be remembered that many of the articles manufactured are requisitioned by the College and therefore are not accredited to the amounts under the column "Amounts received from sales." Besides, there still remain in the industrial rooms many articles that have been kept for exhibit purposes or which have not been sold. Were these all to be sold, the total would be very greatly increased.

Perhaps a word of explanation regarding the difference in the amount of sales for the two years, would not be out of place. As will be noticed, the number of sales and the number of articles manufactured for the year 1922-23 was in excess of those for 1923-24. This is due to the fact that in 1922-23 there were more taking industrial work as a major subject than in the following year and also more trained workers in this year than in the latter year.

Although I am not required by law to make further reports, yet I am taking the liberty of doing so, believing that the following tables will be of interest:

During the Biennial Period 1922-23 the Iowa School for the Blind has received for Support the following funds:

REPORT OF PHYSICIAN

Superintendent F. E. Palmer:

I have the honor to herewith present the Biennial Report of the Health Department of the Iowa School for the Blind. This report covers the school years of 1922-23 and 1923-24.

At the opening of the school year each pupil has been given a physical examination to discover any dangerous contagion or any defect that can be remedied; and each month during the year each pupil is weighed by the nurse in order to find out whether pupil's weight is normal or not, and if not the pupil's diet is carefully looked into and measures are taken to improve the physical condition.

Doctor H. E. Kelley has been appointed dentist to the school and his report for the year just passed is hereto attached.

The pupils have been vaccinated against smallpox. Those having a positive Schick test have received toxin-antitoxin. Attention is called to a pupil entering the school for the first time in September, 1923. This pupil had been sick for several days before being reported to our department. He had a well developed case of diphtheria, but in spite of his intimate contact with the other pupils, not one case of diphtheria developed. Had this boy been immunized by toxin-antitoxin it is fair to suppose he might have escaped.

During January, 1924, Wasserman tests were made of all the pupils excepting the senior girls. Sickness in the school prevented the completion of this work, which will be finished at an early date.

	1922-23	1923-24
